Education

University of Illinois Chicago — Chicago, IL
Bachelor of Science in Computer Science, Minor in Mathematics — *Expected Dec 2028*

Relevant Coursework

Completed: CS 151 – Mathematical Foundations of Computing; CS 211 – Programming Practicum
In Progress: CS 251 – Data Structures; CS 261 – Machine Organization

Experience

Coding Instructor — August 2023 – May 2024
Code Ninjas — *Naperville, IL*

- Taught programming and game development to students ages 7–14, adapting technical concepts and hands-on lessons to individual learning levels.
- Applied self-taught Unity development experience to mentor students through over 100 game projects, providing guidance on design, implementation, and debugging.
- Supported the development of more than 30 published games, helping students transform creative ideas into functional and playable projects.
- Guided students in C++ and Python fundamentals while strengthening their debugging, problem-solving, and independent development skills.

Web Development Intern — December 2023 – May 2024
Metea Valley High School — *Naperville, IL*

- Collaborated with school administrators, teachers, and students to gather requirements and translate feedback into improvements for an internal faculty website.
- Developed frontend interfaces using HTML, CSS, and JavaScript to support faculty calendar management and administrative appointment scheduling.
- Contributed to backend functionality, troubleshooting website issues and refining scheduling features based on stakeholder feedback.

Projects

SHPE Website – Frontend Developer & Webmaster — Sep 2026 – Present

- Develop and refine frontend website components, improving page layouts, navigation, and interface consistency for the SHPE organization.
- Collaborate with up to 13 developers to coordinate development tasks, communicate progress, and incorporate feedback into website improvements.
- Troubleshoot frontend issues and maintain consistent website functionality through collaborative development and testing.

EcoScanner – Chrome Extension — 2nd Place – HackFTW 2023
JavaScript, HTML, CSS, Chrome Extension APIs, Webpack

- Collaborated on a Chrome extension designed to help consumers identify environmentally friendly products while shopping online.
- Led API integration efforts, connecting external services with JavaScript functionality to support product sustainability analysis.
- Developed frontend functionality and troubleshot integration issues alongside team members during hackathon development.

Technical Skills

Languages: Java, Python, C/C++, JavaScript, SQL (PostgreSQL), HTML/CSS, R
Frameworks & Technologies: React, Node.js, Flask, FastAPI, JUnit, Material-UI, Unity
Developer Tools: Git, Docker, Webpack, Travis CI, Google Cloud Platform, VS Code, Visual Studio, IntelliJ IDEA
Libraries: pandas, NumPy, Matplotlib
